## GENERAL MANAGEMENT

### OHB System AG

#### Executive Board

Marco R. Fuchs (CEO)  
Andreas Lindenthal (COO)  
Dr. Fritz Merkle (CMO)  
Boris Penné  
Dr. Ingo Engeln  
Dr. Wolfgang Paetsch  
Kurt Melching (CFO)  
Guy Perez (CTO)

## POINTS OF CONTACT

### Business Development & Marketing and Sales

Dr. Timo Stüffler  
Dr. Cornelius Schalinski

Dominik Lang

### Space System Studies

Dr. Rolf Janovsky  
Norbert Lemke

### Supply Chain Management

Gerd Heinrich

### Corporate Communications

Julia Riedl

## TURNOVER AND PERSONNEL 2017

### OHB System AG

Turnover (Mio. €) .....	>500
Personnel.....	>1.000

### OHB SE

Turnover (Mio. €) .....	826
Personnel.....	>2.400

## STRUCTURE AND ACTIVITIES

OHB System AG is the 3rd Large System Provider in Europe belonging to the OHB SE (Prime Standard, ISIN: DE0005936124), which employs more than 2,100 people in the areas of "Space Systems" and "Aerospace & Industrial Products". OHB System AG specializes in high-tech solutions for space, science and industry.

### Main Activities:

- LEO, MEO & GEO satellite systems and constellations for navigation, science, telecommunication and Earth observation
- Integrated crypto systems (ground/space)
- Microgravity Systems and facilities for human spaceflight and microgravity research
- High speed data links for aerial reconnaissance systems
- Scientific instruments for satellites, interplanetary probes and the ISS
- Robotics, on orbit-servicing and de-orbiting of satellites
- OCAM, autonomous on-board video and data acquisition system for launchers
- FOTON/Bion: Scientific instruments on Russian re-entry capsules
- Sounding Rockets: Payload implementation

## MAIN CONTRACTS

### Satellite Systems - Prime

- SAR-Lupe 1-5 (Reconnaissance)
- SARah (Reconnaissance)
- Galileo FOC (Navigation)
- SmallGEO (Artes-11 / Hispasat AG1 / EDRS-C / Electra)
- EnMAP (Earth observation)
- Meteosat Third Generation (MTG): Sounder Mission and Instrument (Earth observation)
- TET-1 (Micro Satellite for On-orbit Verification and Earth observation)
- ORFEUS: EUV-telescope (Science)
- Heinrich Hertz (Communications)
- PLATO: Instrument and Mission Design (Science)

### Human Space Flight Microgravity - Prime

- EPM (European Physiology Modules) on ISS
- EDR (European Drawer Rack) on ISS
- Flywheel Exercise Device on ISS
- Plasma crystal experiments on ISS (PK4)
- EXPOSE: Multi-user Facilities for Exposure on ISS
- ANITA: Trace Gas Monitoring System for cabin air
- Exobiology Facility Spectrometer

### Contributions to Main Contracts

- MTG-FCI (Earth observation)
- On ISS: various contributions for COF and Nodes 2/3
- BIOLAB on ISS
- TEXUS/MAXUS: Service systems and mission support for sounding rockets
- MELFI: sub-systems for the freezer for extreme low temperatures on ISS
- Sentinel-4 (Earth observation)
- ExoMars 2016/2020 (Exploration)
- XMM-Newton: Main Mirror modules for ESA's X-ray telescope
- SOFIA: Development of the airborne IR-telescope
- PACS: Infrared spectrometer and photometer for ESA's Herschel telescope
- SUNRISE: Balloon-borne 1m telescope
- Bepi Colombo: Thermal Infrared Spectrometer MERTIS
- FLEX Instrument: Two spectrometers, Camera systems and optical slit assembly
- EDRSC-C

### Major Studies

- CarbonSat Constellation (Earth observation)
- Marco Polo (Science)
- e.Deorbit System Study (Robotics)
- ELECTRA (Artes-33)
- Heinrich Hertz DLR Mission (Telecommunication)
- AIS (Telecommunication)
- Various Lunar Exploration Studies
- Studies on early warning and space situational awareness
- Security systems for satellites
- Asteroid Impact Mission
- Dream Chaser® for European Utilization
